

# COUNTRY ALMANACK

For the Year, 1676, August 1

Being Bifextile, or Leap-Year,

Suited to the several Capacities

of Gentlemen, Scholars, Tradesmen,

and Husband-men,

And accompanied with Re-

marks in Verse, upon every Month

In the Year: pleasant, and

not tedious.

To which are subjoyned,

Many Additionals, Old, and

New; delightful to be read, and

useful to be known.

*Omne solum punctumque mensurat utitur.*

LONDON,

Printed by F. L. for the Company of  
STATIONERS, 1676.

to 26. The 26. was a day of violent winds, and a shower of rain, with  
the Thunder. With the same day, till four o'clock, I spent  
the day at home, that being a day of rain, and so I could  
not go out. I had been in the shop the night before, and I was  
in a bad way to go out with a light rain of rain, and a  
few. Fall weather, with some showers intermixed, not al-  
together without some winds, and cloudy vapours, so as to  
make the day very disagreeable, and if it is always such as  
this, it is bad in fact indeed. But suppose such a thing possible,  
it is remained still the double Spring, my Providence is only  
possible, and conjectural, not pronounced to be infallible; and if  
they misarranged where the observer dwelt, how can he tell they did  
so every where else? But however, since we have such excellent  
opportunities of singular advantage, I think it convenient for me to  
be there alone; assuring myself, that wise Readers will like me  
more the worse for leaving the company of them.

Others for the sake of many Misrepresentations put in former  
and additional, which I hope will be of public use, and  
be a just proof of the old ones, as I thought fit to refuse, and  
not to represent them truly Collected. If they come out to their  
hands, though it may seem trouble, it is not my fault, but I do  
not so serve thee faithfully, as when I offer, then I intended  
to do so, that I would not trouble thee with a violent promise,  
which half-promises, shall not have a whole performance.

**Vol. 85**

B-2

## A brief

# A brief Chronologic.

Great Jeshu's Heaven and Earth did shake, 21  
 For the first time the World was shook, 22  
 As all Builders thereupon were laid, 23  
 And all Foundations were dissolved, 24  
 The first out of Egypt Land did go, 25  
 As all the World was overthrown, 26  
 As all the World was overthrown, 27  
 As all the World was overthrown, 28  
 As all the World was overthrown, 29  
 As all the World was overthrown, 30  
 As all the World was overthrown, 31  
 As all the World was overthrown, 32  
 As all the World was overthrown, 33  
 As all the World was overthrown, 34  
 As all the World was overthrown, 35  
 As all the World was overthrown, 36  
 As all the World was overthrown, 37  
 As all the World was overthrown, 38  
 As all the World was overthrown, 39  
 As all the World was overthrown, 40  
 As all the World was overthrown, 41  
 As all the World was overthrown, 42  
 As all the World was overthrown, 43  
 As all the World was overthrown, 44  
 As all the World was overthrown, 45  
 As all the World was overthrown, 46  
 As all the World was overthrown, 47  
 As all the World was overthrown, 48  
 As all the World was overthrown, 49  
 As all the World was overthrown, 50  
 As all the World was overthrown, 51  
 As all the World was overthrown, 52  
 As all the World was overthrown, 53  
 As all the World was overthrown, 54  
 As all the World was overthrown, 55  
 As all the World was overthrown, 56  
 As all the World was overthrown, 57  
 As all the World was overthrown, 58  
 As all the World was overthrown, 59  
 As all the World was overthrown, 60  
 As all the World was overthrown, 61  
 As all the World was overthrown, 62  
 As all the World was overthrown, 63  
 As all the World was overthrown, 64  
 As all the World was overthrown, 65  
 As all the World was overthrown, 66  
 As all the World was overthrown, 67  
 As all the World was overthrown, 68  
 As all the World was overthrown, 69  
 As all the World was overthrown, 70  
 As all the World was overthrown, 71  
 As all the World was overthrown, 72  
 As all the World was overthrown, 73  
 As all the World was overthrown, 74  
 As all the World was overthrown, 75  
 As all the World was overthrown, 76  
 As all the World was overthrown, 77  
 As all the World was overthrown, 78  
 As all the World was overthrown, 79  
 As all the World was overthrown, 80  
 As all the World was overthrown, 81  
 As all the World was overthrown, 82  
 As all the World was overthrown, 83  
 As all the World was overthrown, 84  
 As all the World was overthrown, 85  
 As all the World was overthrown, 86  
 As all the World was overthrown, 87  
 As all the World was overthrown, 88  
 As all the World was overthrown, 89  
 As all the World was overthrown, 90  
 As all the World was overthrown, 91  
 As all the World was overthrown, 92  
 As all the World was overthrown, 93  
 As all the World was overthrown, 94  
 As all the World was overthrown, 95  
 As all the World was overthrown, 96  
 As all the World was overthrown, 97  
 As all the World was overthrown, 98  
 As all the World was overthrown, 99

**The twelve Signs, or Constellations of the Zodiack**  
with the parts of Mans Body, said to be subject to them.

<i>Aries</i> , Head, and Face.	<i>Libra</i> , Reins, and Loins.
<i>Taurus</i> , Neck, and Throat.	<i>Scorpio</i> , Secret Members.
<i>Gemini</i> , Arms, & Shoulders.	<i>Sagittarius</i> , The Thighs.
<i>Cancer</i> , Breast, and Stomach.	<i>Capricornus</i> , The Knees.
<i>Leo</i> , Heart, and Back.	<i>Aquarius</i> , The Legs.
<i>Virgo</i> , Bowels, and Belly.	<i>Pisces</i> , The Feet.

The Golden Number.	The Cycle of the Sun.
The Year.	The Dominical Letters. B. A.

For Eclipses, Falls, Terms, and Eclipses, see the  
Kalender, concerning which, take their notes.

The Numbers standing towards the right hand in the  
third Column, shew what Degree the Sun is in of the Sign last  
before named: by which also it is easie to Collect what Sign  
he is in on other days, where there is not convenient room for  
inserting those Numbers.

In the fourth Division, or Column, are three small Co-  
lunels, noted on the top thus H. M. H. whereof the first Co-  
lunel contains the hour of Sun rising, the third, the hour for  
Sun setting, and the middle sheweth the minutes that the Sun  
is after the one, and before the other. *Example.* Jan.

The Number 8. 9. 4. signifieth that the Sun riseth that  
day 8. minutes after 8. and sets 9. minutes before 4.

The rest are easie ordinary things, to avoid heinous  
my Country friends may imagine this Explanatory Scheme  
fixed on the head of every Month page.

Day of the Month.	Day of the Week.	Notes	Notes

Could we, like *Jane*, but reflect, and see,  
How new years, by the old ones, suffer'd be;  
Our fore-sight (though but little,) would conclude,  
We may by dreadful vengeance be pursued,  
Full crammed Paunches, Heads with Liquor swelling,  
Phantastick Chambers, furnished with costly swimming,  
Plays Bottom-Revels, swearing, and (which is  
Worse than the rest) the Courting of a Mill;  
(Or, in plain English, keeping of an Whore,  
While th' honest Wife is turned out of th' door :)  
Excessive idleness, prodigious Cheats,  
Reeking young Doctors out of ancient Seats,  
Are Christmas Scenes, oft acted without fear,  
By some that pray *God send us good new Year*.  
They might as well, with the *Wild-Beast*, say,  
*Lord help us, in our Rabbies, to day*.

No, no, fond Fools, while Sin is in the Root;  
Never expect to gather wholesome Fruit.

B 4

Feb.

# February 28 days.

New Moon the 3<sup>d</sup> day, 39 min. past 6 in the evening.  
 First quarter the 11<sup>th</sup> day, 49 min. past 4 in the evening.  
 Full Moon the 19<sup>th</sup> day, 16 min. past 9 in the morning.  
 Last quarter the 26<sup>th</sup> day, 2 min. before 1 in the morn.

Poul-weather is no news; Hail, Rain, and Snow  
 Are now expected, and shew'd no woe;  
 Nay, 'tis an Omen bad, the Yeomen say,  
 If Paddy shows his Face the second day.  
 Colds now are plenty, Ague-fits are rife;  
 And Feavers (though more rare) endanger life.  
 Mean while the Lawyer, eager at his sport,  
 Gables Up Coyn from them that cares not forth.  
 'Tis strange to see how Clincks Mens genius alter,  
 Neither at home did spare, patch, pria, and palter;  
 And had no peace to give the Poor, nor lend  
 Gamour at Whimsies bred precept and end.  
 Honour will speed, when Chaney's said nay;  
 The Country-Counsellors post fast away;  
 (The middle of this Month) home-bound with Gold,  
 Which Neighbour Widgeont had, but could not hold.  
 Who now is rage desire them as a prize,  
 For the new Padder that in Ambush lies.

Some new contents; but thy triumphant Leek  
Inspires me with such notions, that (methinks) soon  
My Lungs and Wind-pipe have no empty chance,  
If Money now durst back against our Nations,  
We would him choke with fallow crucifixions.

And if that Devil on our Lips do play,  
We'll send him with a flaking-break away.

When Cuckoo comes, she's moul't with spick'd Leeks,  
So that she shall not sing for certain weeks.

Let hark the pretty Choristers of the Wood,  
Having harry'd the new sown-Fields for Food,

Discharge their various notes, and sing  
In honour Anthem to their heavenly King.

Sweet Graces! they are pleas'd with the Present race,  
They fear no want, no danger, nor offence.

And shall not we thus live by Faith excell?  
In confidence, such as in Buses dwell?

No bluffing! Made from the bottom, my wife  
 His own air, and his own words, I know  
 Yet I am not (with a sigh) I know  
 His words are his own words, I know  
 Nothing more welcome now than his words;

## China: The Earth with Grain, Grass, Fruit, and Flower

In Justice Court for Justice Andrew Tully, v. 15-12-1  
 versus John and William L. Shaver for Justice  
 Shaver, on 15th of March, the Month last (1891),  
 Defendant's house, the value of Gold and Silver,  
 the Knight and the Lady in their pomp and train,  
 the Marston with the Gowd-men both remain,  
 Come home poor Simoleon, and let them prate,  
 and let the Court-masters with thine Estate.

What's given is well laid up, but what is spent  
Is hated thy fall, and Neighbours discontent,  
Is more than lost, then it were cast away.

1. The first part of the document is a letter from the President of the United States to the Congress, dated January 1, 1861. It is a formal communication, and it is written in a very formal and dignified style. The President expresses his regret that he cannot deliver the message in person, and he explains the reasons for this. He then proceeds to discuss the state of the Union, and he mentions the recent election of Abraham Lincoln as President. He also mentions the secession of the Southern States, and he expresses his hope that the Union will be preserved.

Welcome most pleasant Season of the Year,  
 The little Lamb now first is without fear,  
 The Woods look green, Birds whistle out their notes,  
 And haunts sorrow by their chirping notes,  
 Yellow be clad with Flora's Livery,  
 Delights the meditating walkers Eye.  
 The Inoplar's now a Simpleton indeed,  
 That cannot on the Herbe God's goodness read,  
 The Milk-maid sings, while Cherry chews her Cud,  
 And by her looks declares her Pasture's good,  
 All this is in the Vale of Tears below,  
 But who will see the true Elyzium show?  
 Which our blind Poets garb'd with phancies wild,  
 And by their carnal Sentiments defild,  
 That glorious blissful place, that's always green,  
 Though having built in full perfection seen,  
 Where Angels, and the blessed Saints above,  
 Sing perfect comfort in high strains of Love.

August bears great Augustus's name,  
Who did the Roman Empire frame.

When he, who the materials got,

[\*] Julius Caesar.

Was hinder'd by a deep-laid plot,

That made his life he could not rear,

The Structure then cast himse' deare,

So oft it falls, that they who rake

The greatest pains, do only make

Another's Market, who inherits

The fruit of all their toyle and merits.

Tet should we not discourag'd be,

But as the Husband-man we see,

Sowing much Seed, when Corn's not cheap,

A vaster quantity to Reap, &c

(Who many months with patience stays,

And for Heav'n's blessed influence prays.)

At length hath such a goodly Crop

As answers, yea, exceeds his hope;

So those who, to the Spirit true,

Home with their Sheaves do joyful goe.

September hath xxx days.

First Quarter the 4th. day, 48 m. past 7 in the Even.  
Full Moon the 11th. day, 28 m. n. before midnight.  
Last Quarter the 20th. day, 26 m. before 1 in the mo.  
New Moon the 27th. day, 16 min. past 11 in Morn.

# Remarks upon October.

168

Our Country-Dale, who hath his Suits depending,

Impatient till the long Vacation's ending;

Having both reapt his Fields and re'd his Barn,

And forc'd his Wife to sell her Wooled yarn,

Grants all into a Puff, and up he lies,

Where he is welcom'd in this cunning wise;

Your Servant Sir, I'm glad to see you here,

Your honest business on calm and clear;

The ablest Counsel money can procure,

Give us in black and white, all's safe and sure.

Your Declaration is so purely drawn,

That on your side my very head I'll pawn.

Stare not so good a Cause; Now that you have

A way to be reveng'd both safe and brave;

Be sure to lay on loud, and spare no cost,

For not a Penny of it shall be lost.

The Fool enflam'd with such hopes as these,

Sicks not at double, nor yet treble fees;

And if you long what's his success to know,

Another page the same shall quickly show.

# November hath xxx days.

The Goose-caps Cause to bearing comes at last,  
And by the Jury he is roundly cast:

The Adversaries Counsel for'd with pray,

Cost may be paid them, & re be part away.

But the wife Court, more pitiful than so,

Order him sometimes, and lets him sometimes go.

At a time the Penny-fagger crys again,

Loose not so good a Cause, but try again.

Those that recover thus at last miscarry,

(Nothing among us is more ordinary).

Are this, & never such a Pannel saw,

Not Verdict brought so contrary to Law.

Your wheezing Witness, if the Jury heard him,

Did stand all dead, but they did not regard him.

I like your Spirit well, the Ruffick crys,

"But where's the Case! What I have from Supplies?

"My money quite consumed, my money gone:

"How should I then another Suit bring on?

And so the Cause is lost, & the Cause is won.

And so the Cause is lost, & the Cause is won.

And so the Cause is lost, & the Cause is won.

And so the Cause is lost, & the Cause is won.

And so the Cause is lost, & the Cause is won.

And so the Cause is lost, & the Cause is won.

And so the Cause is lost, & the Cause is won.

And so the Cause is lost, & the Cause is won.

And so the Cause is lost, & the Cause is won.

And so the Cause is lost, & the Cause is won.

And so the Cause is lost, & the Cause is won.

And so the Cause is lost, & the Cause is won.

And so the Cause is lost, & the Cause is won.

And so the Cause is lost, & the Cause is won.

And so the Cause is lost, & the Cause is won.

And so the Cause is lost, & the Cause is won.

And so the Cause is lost, & the Cause is won.

And so the Cause is lost, & the Cause is won.

short days and cold, but long and colder nights.  
Enough with their great rigors to affright us. 215

Save that we were enured to it before.

We had begun with trembling on our store.

Along dead time's begun, and doubtless cruel

to Mows of Corn and Hay, and stacks of Flour.

humblest servant, who knows on what we live.

and great supplies in Summer did not grow.

...take we heed, lest we in riot spend

That which was sent me to a better end.

If we in Christmas, Game away our Stock.

whereby we might relieve Christs wanting flock:

if we Feat and Rjo, while the poor

is ready to be starved at our door:

Wonder if the mighty Lord of Heaven

when these Earthly things were freely given.

Fell heavy on their Persons and Estates

Which put them to the uses that he bars

Additional.

Northw.	Southw.	Northw.	Southw.	Northw.	Southw.
Virgo.	Pisces.	Leo.	Aquarius.	Cancer.	Capri.

**The Explanation, and Use of the foregoing Table.**

1. The word [Northward] over the Names of these six signs, *Aries, Taurus, Gemini, Cancer, Leo, and Virgo*, shews, that when ever the Sun is in any of those signs, his declination is ever Northward from the Equator. In like manner the word [Southward] over the rest of the signs, shews, that when he is in any of those signs, *viz. Libra, Scorpio, Sagittarius, Capricorn, Aquarius, or Pisces*, his declination is ever Southwardly.

2. The degrees belonging to the signs on the head of the Table, must be sought in the first Column downward, but those belonging to the signs at the foot of the Table, are to be found in the last Column upward.

3. To find the declination of the Sun any day in the Year, find the Suns place over against the day of the Month in the Kalender; then entering the foregoing Table, find the same sign and degrees; then if the sign be Northern, the Angle which it maketh, with the degree found, shews the degrees of declination, and the number next after it in the same line shews the minutes.

**Examples.**

May 15, the Suns place in the Kalender is the 15. deg. of *Gemini*; then finding *Gemini* on the top of this Table, and 15 in the first Column, the Angle where they meet, gives me 21 degrees, and the next number in the same line is 01, which shews the minutes; hence I conclude that May 15 the Sun declines Northwardly by 21 deg. or min. So likewise, July 18, the Sun is in the 18. deg. of *Leo*, and in the common Angle made by *Leo*, and his 18. degree (found in the last Column of this Table upwards) I find 18 degrees, and the number next following in that line gives me 35 minutes.

But if the sign be Southern, the common Angle made by the sign, and its degree, gives the minutes, and the number next before in the same line, shews the degrees.

**Examples.**

Jan. 14 the Sun's place in the Ecliptick is the 3. deg. of *Aquarius*. Now in this Table, *Aquarius* and his 3. deg. in their common

Angle give us 12, which are the odd minutes, and the number 19, next proceeding in the same line signifies the degrees, whence I conclude, that Jan. 14, the Sun declines 29 deg. 12 min. Southward. In like manner *Example 2.* The Sun being in the 21 deg. of *scorpio*, his declination from the Equator is found by this Table to be 18 deg. 4 min. Southward.

**V.**

A quick and easy way to extract any Root out of the  
biggest Power, and vallies Numbers, by the help of Log-  
arithmes; newly improved, and never before the last Edi-  
tion.

**T**HE Faculty of entailing all sorts of Rights is a certain rational Assent, and that no method for carrying it farther as that by Logarithms are truths (as I take it) beyond all possibilities of denial.

The only thing that allows their excellency, is that the largest Cannon ( as Dr. Whiston in Folio ) profits one by all evens to give us the Logarithm of any Number exceed-  
ing 10 Millions; and this Proportion is so scanty, that without some farther invention, it will not furnish us with the Logarithmes of the Cubes of 100, 1000, and of 10000. The second unfold of 12. Or the third unfold of 15. And I know no other that have made it his business to shift us in this sort. But by the help of the Rule following, any Root may be extracted, though the Number given exceed 10. The first Mil-  
lion; of Mil. four. 40. Thousand times each for this Num-  
ber, 4723664134064513606. It much larger than 10,  
yet by the Rule any Root designed may be drawn, and spe-  
cially extracted out of it.

3400

in this case against him & his dog in their common  
place in the field is the 3rd dog.

So to find the Logarithme of any power of a Number, find the Logarithme of the Number given, and multiply it by that power, and the product will be the Logarithme of the power sought. For example, to find the Logarithme of the 1000th power of 10, find the Logarithme of 10, which is 1, and multiply it by 1000, and the product 1000 will be the Logarithme of the power sought.

Example: To find the Logarithme of the 1000th power of 10.

Let the Logarithme of 10 be 1, and multiply it by 1000, and the product 1000 will be the Logarithme of the power sought. For example, to find the Logarithme of the 1000th power of 10, find the Logarithme of 10, which is 1, and multiply it by 1000, and the product 1000 will be the Logarithme of the power sought.

Now, if you divide the Logarithme of the power sought by the Logarithme of the Number, you will find the power of the Number which produces the power sought.

For example, to find the power of 10 which produces the 1000th power of 10, divide the Logarithme of 1000 by the Logarithme of 10, and the quotient 1000 will be the power sought. For example, to find the power of 10 which produces the 1000th power of 10, divide the Logarithme of 1000 by the Logarithme of 10, and the quotient 1000 will be the power sought.

180

*The Quantity* in the Integers. So that if all these 15 figures had been changed into cyphers, or other figures at pleasure (due places and Index being observed) there would have been no observable difference.

This also may be farther noted, that though in this way of demonstration, I have only applyed it to a number consisting of 15 places; the grounds I go upon, demonstrate the work to be feasible where the numbers as great as Imagination it self can frame.

## VI.

*Three new Problems concerning Interest, and Annuities in the Logarithmical way.*

### Prob. I.

To find the time wherein a given sum of money will be increased to any sum required, at any rate of Compound Interest.

#### *The Rule.*

Subtract the Logarithme of the less sum, out of the Logarithme of the greatest. Their difference being divided by the Log. of 1 pound, and its Interest for a Year (usually called the Log. of the rate, and so I shall call it hereafter) gives the time.

*An Example, by way of Answer to a Question.*

Quest. In what time will 100 pounds, amount to 200, at 6 per Cent. Compound Interest.

Ans. In 11.774 Years, or 11 Years, 11 moneths, and 10 days, &c. as here appears.

**Prob-**

Prob. 11.

To find the time wherein a yearly payment will pay off a (possible) Debt, as any rate of Compound Interest.

The Rule.

Having found the correspondent principal (as in the former Problem) subtract the Debt out of the correspondent principal, and the Logarithme of their difference from the Logarithme of the correspondent principal. This last difference divided by the Log. of the rate, shews the time. As in this Example.

Quest. In what time will a yearly Rent of 57l. pay a Debt of 740 l. at 6 per Cent. Compound Interest.

Ans. In 25 1/2 Years, or (by Reduction) 25 Years, 10 Months, and 25 Days, &c. as here appears.

6.	100	57	Logarithme of 950	3.97772361
		57	Logarithme of 210	2.3221929
6)	5700	910	Log. of the rate 1.030834	Dif. 66850432 (25 1/2)
	56	740		14938712
	30	210		12651930
	20			21857820
	00			2277174

				7591712
				6618120
				11826
				30
				251286

*The Century Magazine, 1874.*  
I have for brevities sake, confined my list to a single Example under every Problem, and that \$11. at 6 per Cent, because that is the usual rate, and tolerated by Law. But the Rules are Universal for any rate of Interest, and accommodable by Artifice to Annuities paid half yearly, or quarterly; yea (if they please) monthly, Weekly, or daily; supposing them to be acquainted with the ordinary methods of finding the arrears, or present worth of such Annuities.

## VII.

*Advice touching the Posts, and Roads, according  
to Sir Samuel Morland*

*Letters may be sent from London.*

*On Mondays, to France, Spain, Italy, Germany, Flanders, Swedenland, Denmark, Kent, and the Downs.*

*On Tuesdays, to Holland, Germany, Swedenland, Denmark, Ireland, Scotland, all Parts of England, and Wales.*

*On Wednesdays, to all Parts of Kent, and the Downs.*

*On Thursdays, to France, Spain, Italy, all Parts of England, and Scotland.*

*On Fridays, to Flanders, Germany, Italy, Swedenland, Denmark, Holland, Kent, and the Downs.*

*On Saturdays, all Parts of England, Wales, Scotland, and Ireland.*

Letters are returned from all parts of England, and Scotland, certainly, every Monday, Wednesday, and Friday; from Wales, every Monday, and Friday; and from Kent, and the Downs, every day; but from other places more uncertainly, in regard of the Sea.

### An Example to explain the use of the *Table*

To know what Moore makes a full Sex at Night out of, what kind of audience, that will be on Jan. 1, the prime time.

2. I find that in the past Bank of the East part of the tide-river, beginning with Alameda, and by inspection it appears that when the Moon is East, or West, the tide will be full.

1. The Motion picture, "The Motion picture," calls me, then upon, 3-  
1. The Motion picture, "The Motion picture," calls me, then upon, 3-
